LIFE BOAT RESCUES SHIPWRECKED CREW.

New York, Aug. 17.—A southeast gale which piled the surf high on the southern coast of Long Island drove the schooner Arlington, of Boston, on shore this morning. Her decks were swept by the heavy seas and the crew of eight took refuge on the bowsprit. The Long Beach Life Saving Crew tried in vain to shoot a line over the wreck and for five hours waited for a chance to launch a life boat. One of the crew of the schooner attempted to carry a line ashore on a raft but was swept out to sea in the direction of Sandy Hook. After a long wait the life savers succeeded in launching a life boat and rescued the seven remaining men, including the captain.

Madden Pierson, the sailor washed out to sea on a life raft while attempting to carry a line ashore was later rescued at Rockaway Beach.

STATEHOOD AT DENVER

Denver, Colo., Aug. 18.—Gifford Pinchot, with a plea for the conservation of the national resources on the line of the Roosevelt policies, brought a burst of enthusiasm from the Trans-Mississippi Congress this morning, when he reiterated his stand taken at Spokane for the protection of the national forests. He said in part:

"The national duty lies in the direction of conservation. Of this there is no doubt. I can conceive of no higher plane of duty than that of the conservation of the vast resources along the lines of the Roosevelt policies and to these policies I am committed. It is folly to say that there is land in plenty and forests in plenty, when we know that the forests are being depleted. We have forests in plenty now, but in the years to come there will be famine in plenty if we do not take the step in time now."

He said further that it lies with the West to make fertile vast tracts which otherwise will be lost.

Before Pinchot's address, the Arizona delegates offered a resolution demanding separate statehood and other resolutions were offered.

John B. Leeds, of Colorado, seeing in his mind's eye, the Japanese fleets and armies swarming down on Washington, suggested changing the capital to Denver, where the Japanese navy would have no chance.

John W. Noble, former secretary of the interior, spoke on the conservation of forests and water rights.

FLOOD AND HEAT WAVE

Pueblo, Colo., Aug. 18.—A flood in the upper Arkansas valley early this morning cut railroad and telephone communication and inflicted heavy damage on railroad property and destroyed crops.

Pueblo was aroused by flood warnings at three o'clock this morning and 5,000 people worked frantically to remove stocks of merchandise beyond the reach of the high waters. The work was needless in most cases, for while the river rose seven feet above the normal little damage was done.

The greatest destruction was at Canyon City where the steel bridge was washed away. Other bridges were damaged, cattle at the stock yards washed away and several frame cabins destroyed. The Santa Fe yards at Canyon City are under water and a portion of the Denver & Rio Grande tracks were washed out.

In the Royal Gorge the river is reported twenty feet above the normal and wire communication is cut off, but no loss of life is reported.

All west bound Rio Grande trains have been held at Pueblo since ten o'clock last night and no east bound trains can get through.
